TravelDent.Me – the new Dental Tourism chapter

Based on our 7+ years of experience in providing digital marketing services for our clients from the dental industry, we've decided to open up a new chapter and try to integrate hand-picked Dental Clinics and Dental Offices into one online platform – “traveldent.me”

The platform aims to present N. Macedonia as the next destination for dental services abroad. Based on the established quality, experience, technologies and materials used by our dentists, they're positioned at the same level as other Western European dental practices and clinics.

This platform presents North Macedonia as a tourist destination in general, by re-telling the stories about its history, nature and hospitality, in cohesion with the high-quality and affordable dental services.
