

MAK

TOIS

**FACTORY FOR
PRODUCTION, DECORATION AND
CONFECTIONING OF PLASTIC MASSES**

Introduction

- ▶ Maktois was founded for production of toys for kinder eggs for a company Ferrero s.p.a from Italy.
- ▶ It was founded in 2006 as an export-oriented company to the European markets.
- ▶ The head office and the factory is in the village of Leshok – Tetovo, North Macedonia.
- ▶ The factory has 200 employees and has 5000 m² working space.

Production

- ▶ Maktois produces plastic mass products and also performs processing like decoration, packaging and ultrasonic welding.
- ▶ The production is performed with high standards of hygiene, because of the food contact (without the use of adhesives).
- ▶ Today, Maktois operates according to the latest and most up-to-date standards for the production of plastic products according to the SMETA and Ferrero standards.
- ▶ The technological process, standards and staff with many years of experience enable us to manufacture all kinds of plastic products in all shapes and sizes.

Quality department

- In every department there is a implemented process for quality control.
- Also Maktois has a special department with trained employes for final control of finish products.
- Final control is made on the finished products before sending, with controlling a procentual pieces of the whole produced quantity (divided in lottos).
- With the final control the factory decides if the product corresponds according the Ferrero requirements.
- Every phase of control is recorded (quality control staff fills special forms after every control, which are stored on a server).

Part from the production machines in Maktois

- INJECTORS
- PAD-PRINT MACHINES
- ULTRASONIC WELDING MACHINES
- AUTOMATIC MONTAGE MACHINES
- TESTING CAPS MACHINE
- AUTOMATIC PACKING MACHINES
- PLASMA AND OVEN (HEAT TREATMENT)
- FOLDING LEAFLETS MACHINES
- VACCUM MACHINE FOR PACKING BAGS

Part from our products made for Ferrero
